EXPERIENCE

2020-09 – CURRENTLY WORKING HERE (2.5 YRS)
SOFTWARE ENGINEER, KAAYLABS
Started working as a front-end dev, later transitioned to full stack development, managing a team of 4 members.

EDUCATION

2015 - 2019
B.E COMPUTER SCIENCE, PSNCET
Secured an UG degree in computer science and engineering.

TECHNICAL EXPERTISE

- Javascript/Typescript
- Node js
- React js/Next js/React native
- Aws/Github actions
- Sql/NoSql databases

ACTIVITIES

Projects I have worked on:
- Searchqore – A property search solutions web application, involved in designing the micro-services architecture and developed and owned few modules to myself.
- Duway.io – An in-house data analytics tool which provides customisable charts and graphs.
- Limemedia – Built a web application along with a mobile app and an application to run on android players, which enabled the client to advertise on trucks with screens attached to its body.
- Kingfisher – Worked on creating an WCMS tool with react and kotlin spring boot backend.
- PamperedChef – Worked on migrating a legacy spring MVC scheduler to nodejs.
- KLOAT – An online assessment tool which I built with my team for the techathon event conducted at kaaylabs, used Golang for the backend.
- Selfridges – Worked on the Pricing Service microservice which receives prices from multiple vendors – processes and stores it and exposes rest endpoints and subscribe-able topics to other parties to retrieve price of any product, used AWS CDK for creating and deploying the application.
